

CLEANFREE

Glass

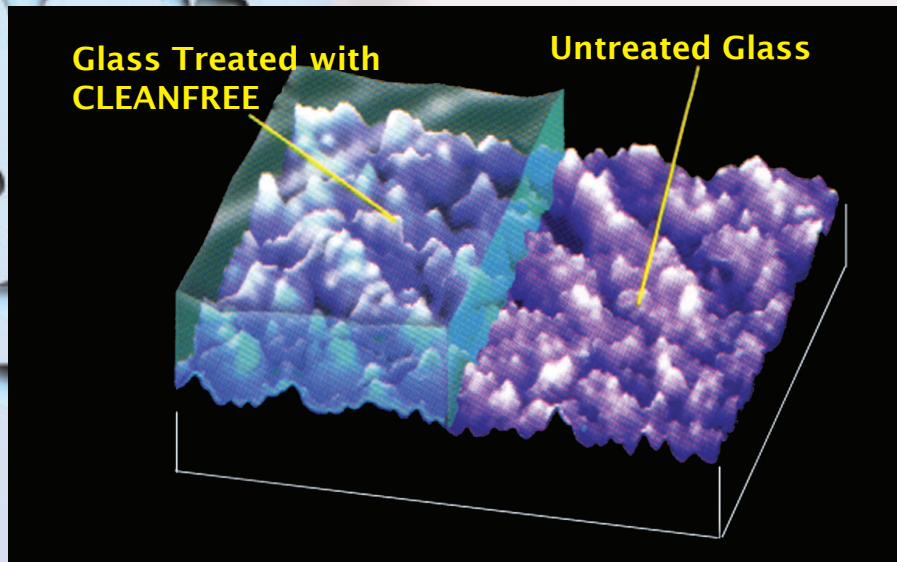

Wouldn't you rather have the choice...

Maintenance Free • Glass Protection

CLEANFREE

Glass

What is Clean Free Glass...

CleanFree is a specially designed glass that eliminates frequent, strenuous, exterior window cleaning. Wouldn't you rather have the choice of when and how often you would have to clean your windows? CleanFree glass has a special chemical that is applied during manufacturing. This special chemical repels water. In doing so, this eliminates the glass surface from being exposed to harsh elements that lead to damage and corrosion. Normal glass is a porous object. After CleanFree Sealant is applied it fills in the open pores making your glass a clean and smooth surface. This helps in making your windows stay clean for a much longer period of time.

Benefits

- ❖ Clarity, Visibility and Cleanliness.
- ❖ Seals Surfaces From Damage and Corrosion.
- ❖ Reduces Maintenance Times and Costs.
- ❖ Provides Easy Glass Cleaning.
- ❖ Eliminates the need for Harsh Chemicals.

Features

- ❖ Application-CleanFree's coating is applied during the manufacturing process. So there is no mess involved whatsoever.
- ❖ Routine Maintenance-time is reduced because CleanFree surfaces are easier to clean and stays clean longer.
- ❖ Protection-against harsh elements that can cause damage to glass.
